

Are you confident in the security of your data when accessed from various locations?

of respondents to Keypoint Intelligence’s *Future of Work* survey said they are concerned about cybersecurity for their hybrid work environments.¹

of respondents found data security to be the most time-consuming challenge while they are working from home.¹

These statistics indicate that while organizations are adopting hybrid work models, they are also aware of the potential security risks associated with remote access to data and are taking steps to address these concerns.

- How are you securing employees’ sharing of information, regardless of location?
- Is there any way to track how information is transmitted, received, maintained, collaborated, and/or destroyed?
- How are your multifunction printers and other printing and scanning devices secured in the office and at your employee’s home office locations?

Solutions Offered by Canon Can Help!

May be shown with optional features
